Middle Lake Roosevelt Basin - WRIA #58

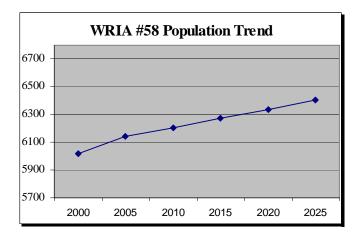

Watershed Description

WRIA #58 encompasses about 707,382 acres of Northern Rockies and Columbia Basin ecoregions. This watershed receives an average annual rainfall of 18 inches per year. Rugged, high mountains are the dominant feature of this region. Elevations are generally 1,300 to 8,000 feet. Mountains have sharply-crested ridges and steep slopes cut by steep walled narrow stream valleys. Soils are derived from acidic rock. Potential natural vegetation includes western white pine, lodgepole pine, western red cedar, Douglas-fir, wheatgrass, fescue, and needlegrass.

Population

There are approximately 6,081 people living in the Middle Lake Roosevelt Basin. The primary population centers are Fruitland and Cedonia. The majority of people live in unincorporated areas. The population graph reflects the combined projected population of those counties located within the watershed (Office of Financial Management population projections).

Counties	% of basin	
Ferry	72%	
Stevens	28%	

Tribal Reservation Lands in WRIA #58		
Colville Confederated Tribes		
Spokane Tribe		

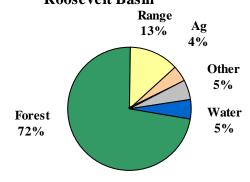

Land ownership for WRIA #58

includes federal, state, tribal and private lands. Data was derived from the Public Lands Survey by Washington Department of Natural Resources (DNR).

Land Ownership	Acres	Proportion
Federal	156,989	22.2%
State	26,141	3.7%
Local	0	0%
Tribal	365,304	51.6%
Private	158,947	22.5%

Land use in the Middle Lake Roosevelt Basin is mainly forestry, agriculture, and water-related uses. The general type of known land-use activities¹ within the watershed is graphed according to the percentage of its occurrence.

¹ Category "other" may include perennial ice/snow, bare rock/sand/clay, quarries/strip mines/gravel pits, transitional, barren, and/or wetland areas.

The primary towns and cities in WRIA #58 include Fruitland, Hunters, Cedonia, Kewa, and Gifford.

Legislative and Congressional Districts

To determine your region's legislative or congressional district, see:

http://www1.leg.wa.gov/DistrictFinder/Default.aspx

To determine Latitude/Longitude coordinates, see:

http://www.topozone.com/

(Make sure you set the button on the bottom of the page to D/M/S - hold the cursor over a spot on the map and the coordinates show at the bottom of the screen.)

Several federal programs refer to watersheds according to their Hydrological Unit Code (HUC). To learn more about your watershed and determine which HUC your town or county is located in, see:

http://water.usgs.gov/wsc/

Water Quality

Water Quality Assessment

The statewide Water Quality Assessment categorizes waterbody segments that have water quality data available. The Simple Query Tool and interactive mapping tool allow you to search for specific categories, water bodies, pollutant parameters, and other information, in whatever combination you choose. WRIA #58 has four (4) known Category 5 (impaired) water bodies.

To view the Water Quality Assessment, use the Simple Query Tool.

http://apps.ecy.wa.gov/wats/WATSQBEHome.asp

To view the Water Quality Assessment by Category, choose the Category (1-5) you are interested in from the drop down box. To view it by Water Resource Inventory Resource Area (WRIA), choose the WRIA number you are interested in from the drop down box.

Use the Interactive Mapping Tool to see a graphic representation of the Water Quality Assessment. This is a Geographic Information System (GIS) application that helps you find waters you are interested in and information about problems in that water body.

http://apps.ecy.wa.gov/wgawa/viewer.htm

Domestic Water Supply

No significant use of surface water sources. For further information regarding water supplies, see:

http://www.doh.wa.gov/ehp/dw/default.htm

Salmonid Stock Status

Good water quality is important to help salmon survive and thrive. To find out which salmon species are listed as threatened or endangered in a region, see:

http://www.governor.wa.gov/gsro/regions/map.htm

Air Quality

Water quality can be affected by air quality; for example, windblown dust from construction sites or bare, dry agricultural lands, especially fallow fields, may be transported to waterways. For information about air quality, see:

http://www.ecy.wa.gov/programs/air/aginfo/Windblown_dust_information.htm

TMDLs and Other Watershed-Based Plans

For information about Total Maximum Daily Loads (TMDLs) in your area, see:

http://www.ecy.wa.gov/programs/wq/tmdl/

To learn more about watershed planning in Washington State, see:

http://www.ecy.wa.gov/watershed/index.html
